Who Am I?

“As an elected official, I owe it to my constituents to find effective solutions to problems that are at the same time cost effective. The problem of juvenile offenders is a particularly thorny one. We want to keep our communities safe. But locking up young people is very expensive—up to $150,000 a year. And is it money well spent? There must be a better way to deal with juvenile justice in my state.”

What Is MST?

We urge you to carefully consider implementing MST. We are an intensive family and community-based treatment program that addresses all aspects in the chronic and violent offenders environment. That sets us apart from other therapies. We get the schools, teachers, neighborhoods and peers involved. And we greatly reduce the recidivism rate. That saves money.
