[a] iTBS - Theta Burst Stimulation/Touchstar, not an accelerated protocol (i.e. multiple sessions per day).

[b] Non-physician practitioners (NPPs) providers may order treatment (or retreatment) if it is within the scope of practice of the NPP in the state they are licensed. It is expected that the NPP has examined the patient, reviewed the record and has experience administering TMS therapy. The treatment shall be given under direct supervision of this NPP.

[c] TMS is reasonable and necessary for up to 20 visits over a 4-week period followed by five visits for tapering for those in remission. For those who show at least 25% improvement by means of the standard tests for depression, the therapy may be continued for an additional 2 weeks (an additional 10 visits) with an additional 6 visits for tapering.

[d] A medical evaluation must be completed by and treating provider is a Tricare Authorized Mental Health Provider (Psychiatrist, PMHNP) trained and capable of performing TMS.

Note: Neuronetics cannot guarantee coverage or reimbursement for NeuroStar TMS Therapy. Final coverage and payment will be determined during the claims review process. All reimbursement information provided by Neuronetics is for general guidance only. It does not represent a statement, promise or guarantee by Neuronetics concerning levels of reimbursement, payment, or charge, if any. Coverage and payment for NeuroStar TMS Therapy are based on various factors.
